

# Skull Mounting System Aircrew

Step into a realm where lightweight design meets robust durability. The Ops-Core® Skull Mounting System (SMS) Aircrew allows for integration with current AN/AVS-9 NVGs using the Aeronox Mount and interface adapter to the SMS Modular Bungee Shroud (MBS). These systems allow for better integration of Night Vision Goggles (NVGs) with the M69 CBRN mask, mitigating the risk of leaks, as well as reducing physiologic burdens of hot spots when wearing NVGs over the CBRN mask. Made of a hybrid composite of nylon and mesh fabric, the Ops-Core Skull Mounting System with Universal Front Plate is an ultra-lightweight stable platform for attaching helmet accessories in environments where ballistic and bump protection is not required.

- **Lightweight, breathable, and stable head mounted platform**
- **One size fits most, simplifies logistics with only one size to stock**
- **Improved center of gravity when using NVGs and rear mounted battery pack**
- **Low cost of ownership**
- **Integrates with legacy communication headsets**
- **Compatible with rail mounted headsets, lights and accessories**
- **Permanent safe-to-fly applicable aircraft**  
C-17, C-5, AC-130, C-130 Series, KC-46, KC-135, C-145, C-146
- **Applicable to all aircrew positions and functions**
- **Low-burden design, improved integration, modularity, scalability and compatibility**

## SPECIFICATIONS

**Weight:** 1.19 lbs (542 g)

**Available Colors:**  Black

Note: All measurements are +/- 3% tolerance

## PART NUMBERS

NSN	Part Number	Description
8475-01-703-1164	A15366-4B3	Skull Mounting System Aircrew (LED), One Size, Black
8415-01-633-9621	19-99-103	Chinstrap Extender, Black

Note: The ANVGMS for FAST Carbon and SMS Aircrew with integrated MBS require use of a new NVG mount and interface shoe. USAF recommends the Wilcox® AERONOX® NVG Mount and NVG Quick-Disconnect Ground Adapter. An AERONOX rear mount battery pack is also available from Wilcox.

## Skull Mounting System Aircrew

### MODULAR SYSTEM UPGRADES

Improve the capabilities of the Skull Mounting System Aircrew by integrating one or more of the following:

*Consult your airworthiness authority before flying with the following options.*

#### NVG Accessories: Battery Pack Wedge

- Secures attachment of NVG battery packs to the rear of the SMS
- Compatible with ANVIS 6 and 9 style battery packs

#### Ops-Core AMP Communication Headset, Rail Mount Kit and Downloads

- Connectorized communication headset configured with headband
- Rail mount attachment to configure AMP to be mounted to top rail of SMS
- Downloads to interface to PTTs and ICS; Airframe ICS download to match 5 ohm impedance ICS
- Hear-through capability to increase situational awareness
