

AMP SMAHT

Connectorized Download Cable

Multi-Channel Capable Headset to PTT Connection

The Adaptive Mission Platform (AMP) Headset allows for multiple download cable options, giving operators the ability to tailor communications to their mission needs and preferences. The SMAHT cable automatically converts the 150 ohm dynamic mic signal to a 5 ohm dynamic or electret equivalent signal with the proper sensitivity to be ideal for use on military and civilian airframe intercom systems. This allows operators to easily maintain excellent communication capabilities in the air, on the ground or sea.

KEY FEATURES

- Cable converts the 150 ohm dynamic mic signal to a 5 ohm dynamic or electret equivalent signal with the proper sensitivity to be ideal for use on military and civilian airframe intercom systems.
- Headset Fischer Connectors provides high quality, environmentally sealed connection points to easily connect and disconnect when mounting or dismounting the air platform.

SPECIFICATIONS

- Dimensions:** 21", 30" and 60"
- Immersion:** IPX7
- Available Colors:**  Black
