

ALPHA[®] 900 Passenger Helmet System

The ALPHA 900 Passenger (PAX) is an upgraded helmet system optimized for aircraft passengers and non-operating crew. Leveraging the modern and lightweight design of the ALPHA 900 Cross-Platform helmet shell, the ALPHA 900 PAX features a simple comms setup, along with a dual VELCRO[®] strap nape system for ease of use by untrained personnel. A non-NVG Rigid Visor Cover is supplied as standard for increased protection, as well as a simplified visor actuator for easier field adjustment.

KEY FEATURES

Customization and Part Similarity

- ALPHA 900 PAX configurator.
- ALPHA 900 PAX and ALPHA 900 use a high degree of common parts to simplify spares for those already fielding the ALPHA 900 helmet.

Updated Retention and Sizing

- ALPHA 900 PAX replaces the current dial with a dual VELCRO[®] strap nape system which creates a simplified solution for personnel who are unfamiliar with aircrew helmets.
- The ALPHA 900 PAX is available in two sizes with an improved comfort liner system allowing a wide range of fitment.

Rigid Visor Cover

- Non-NVG Rigid Visor Cover supplied as standard for increased protection. Velveteen cover customer preference option.
