

AMP Airframe ICS Connectorized Download Cable

Multi-Channel Capable Headset to PTT Connection

The Adaptive Mission Platform (AMP) Headset allows for multiple download cable options. These download cables gives operators the ability to tailor comms to their mission needs and preferences. The Airframe ICS cable converts the 150 ohm Mic signal to a 5 ohm signal and the proper sensitivity to be ideal for use on an airframe intercom system. This allows ground operators to easily maintain excellent communication capabilities both in the air and on the ground or sea.

KEY FEATURES

- Cable converts the 150 ohm mic signal to a 5 ohm signal and the proper sensitivity to be ideal for use on an airframe intercom system.
- Headset Fischer Connectors provides high quality, environmentally sealed connection points to easily connect and disconnect when mounting or dismounting the air platform

SPECIFICATIONS

- Dimensions:** 21" and 27"
- Immersion:** IPX7
- Available Colors:**  Tan  Black
