

Lux™ Liner

4-Point Head-Loc® H-Nape
and Worm-Dial Fit-Band Kits

Seamless Integration, Provides Comfort
During Extended Use

A suspension system that combines a one-piece full-coverage impact layer with comfort pads that can be customized and repositioned for comfort and integration of communication headsets. The durable, modular, breathable pads also have low absorbency. Available in two retention systems, the 4-Point Head-Loc H-Nape Chinstrap, and the Worm-Dial Fit-Band with 4-Point Head-Loc Chinstrap. The traditional H-Nape, designed to support heavier NVGs worn during rigorous activities, combines the padding and chinstrap to retain the helmet, while the Worm-Dial Fit-Band provides a quick adjustment through a low profile and utilizes the padding, fit-band and chinstrap to retain the helmet. Both suspension/retention combinations provide comfort during extended use, integrate with Ops-Core® Helmets, install using the existing VELCRO® brand pattern in the helmet shells, and come in corresponding helmet sizes. The Lux Liner is also available in a vented version for combination with both the 4-Point Head-Loc H-Nape and Worm-Dial Fit-Band. The Lux Liner Vented H-Nape and Worm-Dial Kits are compatible with the Ops-Core FAST® Carbon and FAST Bump non-ballistic helmet systems.

KEY FEATURES

Full Coverage Protection in an Easy to Use, Comfortable Design

- A suspension system that combines a one-piece full coverage impact layer with modular, breathable comfort pads that can be customized and repositioned for comfort and integration of communication headsets
- The traditional H-Nape Chinstrap retention system is designed to support heavier NVGs worn during rigorous activities
- The Worm-Dial retention system provides a quick adjustment in a low profile fit-band
- Designed for comfort during extended use
- Designed for shockwave attenuation
- Pads are durable, breathable, and low absorbency
- The H-Nape/Lux Liner combination seamlessly integrates with Ops-Core FAST Helmets
- The Worm-Dial/Lux Liner combination seamlessly integrates with both Ops-Core FAST and Sentry™ Helmets.

Ops-Core Lux Liner Kits combine a one-piece full-coverage impact layer with comfort pads that can be customized and repositioned for comfort & integration of communication headsets.

H-Nape Version

Worm-Dial Version

Available with a 4-Point Head-Loc H-Nape or Worm-Dial Fit-Band retention system.
