

ACH

Accessory Rail Connectors (ARCs)

Streamlined Platform for Adding Components

Ops-Core® Accessory Rail Connectors (ARCs) transform ACH style helmets into a streamlined platform capable of integrating mission enhancing components and accessories such as visors, mandibles, lights, and cameras. These standard ACH ARCs easily mount to the sides of the helmet using existing chinstrap holes in the helmet. Multiple non-snag attachment points in the helmet provide quick, easy, and secure donning and doffing of accessories and clean routing of external wires and cables in a streamlined configuration to minimize user distraction.

KEY FEATURES

Advanced Streamlined Design Transforms ACH Style Helmets

- Transform ACH style helmets into a streamlined platform capable of integrating mission enhancing components and accessories such as visors, mandibles, lights, and cameras
- One size fits all. (Fits the bolt pattern of Gentex ACH style helmets, sizes small to extra-large)
- Based on Ops-Core FAST™ ARCs
- Quickly mounts to the sides of the helmet
- Mounts using existing chinstrap holes in the helmet
- Multiple non-snag attachment points provide quick, easy, and secure donning and doffing of accessories and clean routing of external wires and cables in a streamlined configuration to minimize user distraction
- Compatible with ballistic visors and mandibles to offer several options for fully integrated face protection
- Visor mounts directly; mandible through a point molded into the rail
- May be integrated with liners and retention systems
- Corners of the rail designed for compatibility with Ops-Core O2 Mask Straps making the helmet suitable for HALO/HAHO operations

The Ops-Core ACH ARCs (shown above with a light) provide a lightweight platform with multiple non-snag attachment points for quick, easy, and secure donning and doffing of accessories.
