

NVG Snap Shields

Advanced Eye and Face Protection and Improved Peripheral Vision

Ops-Core® NVG Snap Shields attach to PVS-15 Night Vision Goggles (NVGs) to help safeguard the eyes and face from fragments and debris without negatively impacting peripheral vision. The NVG Snap Shields were developed as an alternative to standard NVG rubber eyecups, which compromise situational awareness given they obstruct peripheral vision, and can lead to fogging of the NVG ocular lens. Molded with unique light absorbing dyes, the NVG Snap Shields also conceal the phosphorus green glow that reflects off the face from the NVG tubes, which can also impact the soldier's situational awareness. With Ops-Core's unique systems design, Ops-Core NVG Snap Shields easily integrate with all Ops-Core and Gentex® helmet systems, and snap on and off without the use of tools. The NVG Snap Shields meet ANSI z87.

(Patent Pending)

An alternative to standard NVG rubber eyecups, the tool-less don and doff Ops-Core NVG Snap Shields safeguard the eyes and face from fragments and debris with minimal impact to peripheral vision.

KEY FEATURES

Easy Snap On/Off Design; Advanced Performance

- Attaches to PVS-15 Night Vision Goggles (NVGs) to help safeguard the eyes and face from fragments and debris with minimal impact to peripheral vision
- Easily integrate with all Ops-Core and Gentex helmet systems
- Developed as an alternative to standard NVG rubber eyecups, which compromise situational awareness (as they obstruct peripheral vision) and can lead to fogging of the NVG ocular lens
- Available in a Green Glow or Clear version
- The Green Glow version is molded with unique light absorbing dyes that limit the phosphorus green glow that reflects off the face from the NVG tubes, which can also impact situational awareness
- Snaps on and off without the use of tools
- Meet ANSI z87 (modified for this application)
