

SENTRY™ VISOR

For Ops-Core Sentry Helmets

(Patent Pending)

Optimal Optical and Ballistic Performance

The Sentry Visor provides optical clarity and high-level ballistic protection for the Ops-Core® Sentry Helmet Platforms. Engineered to provide an optically correct lens, the visor offers superior performance in refractive power, prismatic deviation, and distortion. The visor is tested against 17 grain FSP in accordance with portions of U.S. Army ACH CO/PD-05-04:2007. The Sentry Visor friction-fits into three positions: fully open, vented, and fully closed. The whisper quiet hinge indexes in 45 degree increments and will not slip out of place when running or maneuvering.

KEY FEATURES

- Compatible with Sentry Mandible (not included)
- Tool-less installation and removal; easy one-handed operation
- Designed for use in conjunction with APEL (Authorized Protective Eyewear List) ballistic eyewear and goggles
- The visor indexes in 45 degree increments for a fully open, vented or fully closed position

Available Colors:

Weight Summary

SENTRY VISOR (SIZE)	M	L	XL	XXL
	0.57 lbs (257 g)	0.58 lbs (261 g)	0.60 lbs (274 g)	0.62 lbs (280 g)

Contact Us

Designed to seamlessly integrate, our comprehensive suite of scalable head protection and situational awareness products provide the warfighter with true system performance. Contact us today to learn more about the Ops-Core Sentry Visor for Sentry Helmet Systems and all our innovative solutions. The Sentry Visor is controlled for export by the U.S. Export Administration Regulations (EAR) 15 CFR 730-774. The export of this item and related technical information requires prior authorization from the U.S. Government.

SENTRY VISOR

INTEGRATED SYSTEM PROTECTION

The Sentry Visor easily integrates with the Sentry Mandible for complete eye and face protection from ballistic threats, backface deformation and blunt trauma. The seamless seal between the mandible and visor prevents exposure to debris and dust that is disruptive to dismounted and mounted infantry.

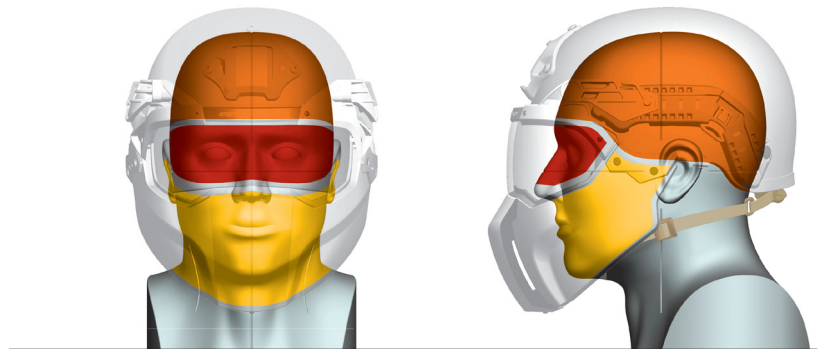

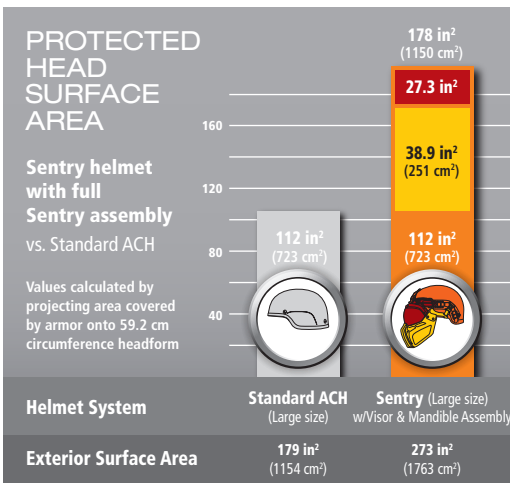

Ballistic Performance

Testing performed in accordance with the following specifications:	Portions of U.S. Army ACH CO/PD-05-04:2007	Portions of U.S. Army ACH CO/PD-05-04:2007
17 gr / 1.1 FSP (V50)	1800 f/s (549m/s)	825 f/s (251 m/s)
9mm FMJ RN (V0 at 0° Obliquity)	1400 f/s (427 m/s)	---
