

AMP U174

Connectorized Download Cable

Multi-Channel Capable Headset to PTT Connection

The Adaptive Mission Platform (AMP) Headset allows for multiple download cable options. These download cables gives operators the ability to tailor comms to their mission needs and preferences. Download cables allow operators to choose the side of the headset they are physically connected to - offering left, right, and dual download capabilities.

CABLE OPTIONS

■ Monaural (using only one channel of transmission)

This cable sends a mono audio signal to the earcup that it is plugged into only. The cable runs two PTTs to two radios, allowing for different comms in different ears.

■ Stereo (using two or more channels of transmission and reproduction)

This cable allows comms to be sent to each earcup when used with stereo PTT.

NOTE: This cable will also behave like the mono binaural cable when used with Ops-Core single channel U94 PTTs.

■ Mono Binaural (of or involving one ear)

This cable sends one mono audio signal to both earcups.

SPECIFICATIONS

Dimensions: 21" and 27"

Immersion: IPX7

Available Colors:  Tan  Black

Manufacturer part numbers:

Cable Description	Color	Size	Part Number
AMP U174 Mono Binaural	Tan	21"	N254584-00-0021
